Boosting Oral immunity

**Low Calorie  
Nutritious Meals**

## Dental & Oral care line-2

StomoAct®  
**Oramune™**

Signature by StomoAct Oramune

4 flavors to choose from **Oral Nutrition**  
**StomoAct Oramune**

StomoAct Oramune is available in **four types** of oral clinically tested ingredients **Based on daily dosage**  
The following ingredients are **the same for each type**.

- ✓ IgY-GP 175mg
- ✓ Stay-C® 50 3.5mg
- ✓ Probiotic 100 million
- ✓ Beta-Glucan 25mg

### Oramune Powder

A simple powder type that focuses on oral care

### Oramune Drops

**Only 1kcal** tablet for easy, on-the-go supplementation

### Oramune Cat Stick

**Low-calorie** oral and nutritional care for cats with sensitive palates

### Oramune Cat Can

Can be mixed with food or given on its own oral and nutritional care

## Dental & Oral care line-3

For daily care with **confidence!**

No rice, no wheat,  
no artificial colors

A central hole  
to prevent tooth damage

Designed to prevent damage to teeth during chewing and to prevent the wick of gum from leaving after eating

[자사 프리벤티스 가수분에 검 실제 사용자 후기]

Stomoact Preventis is a **technology that maintains proper strength and elasticity**

The damage was minimized and the effect was maximized.

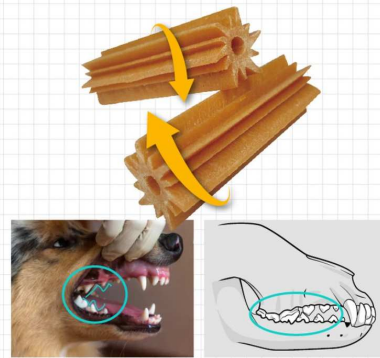

Dangers of tooth fracture due to sharp break

Effective removal of tartar with moderate strength and elasticity

Designed to fit anatomical structures

360-degree large and small bumps work effectively on small teeth as well as molar teeth

StomoAct® **Oramune® Chew**

If your Pet has severe tartar and bad breath, you can use **Preventeeth with BEO together** for better effectiveness

1-2 per day for heavy tartar,  
1 per day for maintenance

StomoAct® **Oramune®**

**Chew**

Gingivitis toxin neutralising antibodyHydrolysed hypoallergenic chewing gum with IgY-GP

## StomoAct BEO

### Discover the enzyme toothpaste that requires no brushing

#### Features and differentiators

1. An **all-in-one product** that targets both tartar and oral inflammation.
2. A **brushless toothpaste** that prioritizes convenience
3. Taste and odor free for less rejection, and **EWG safe** for human consumption.

## StomoAct Preventeeth

### Masticating dental gum with physical tartar removal structure

#### Features and differentiators

1. Different from the concept of conventional chewing dental gum, it has a structure that **physically stimulates the mouth and teeth with large and small bumps to scrape away tartar** from every corner.
2. Made from white fish, it is **not obese**. Hypoallergenic with 500 daltons of hydrolysis.
3. Hygienic packaging and adequate elasticity and strength for feeding senior dogs.
4. There is a hole in the center, so you can put BEO toothpaste in it and solve oral care at once.

#### Step-by-step oral care line

Step 1-2 for easy daily care

**StomoAct** Step 1-2 daily care

As an initial step in dental care, only using the toothpaste can help with bad breath and plaque management along with the 500-dalton enzymatic hypoallergenic dental gum

## StomoAct Oramune

### The best oral nutritional with clinically proven ingredients

#### Features and differentiators

1. A product specialized for the oral cavity by using **patented Igy-GP raw materials** and containing raw materials rather than egg yolk antibody extract.
2. It contains **beta-glucan** specialized in strengthening oral immunity, which helps to **remove tartar**, and is hypoallergenic and highly palatable because it is **made of pollock meat**.
3. One week of feeding is enough to take care of the entire mouth and eliminate bad breath.
4. There are two types of products: a **powder type** that can be fed with feed and a **drops type** that can be given as a snack.

## StomoAct Oramune Chew

### Preventeeth + Oramune = 2 in 1

#### Features and differentiators

**Preventeeth**, a hypoallergenic dental gum with a physical tartar removal structure, and **Oramune**, the best oral comprehensive nutrient, in one.

#### Specialized supplementary product Line

PET SUPPLEMENTS

#### Oral support supplement

**Oramune™**

StomoAct® Oramune

stomatitis

bad breath / tartar

gingivitis / periodontitis

oral immunity

Oramune containing targeted antibodies against pathogenic bacteria and clinical verification ingredients

- ✓ IgY-GP
- ✓ StayC-50®
- ✓ Probiotics
- ✓ Beta-Glucan

#### Step-by-step oral care line

Step 1-2 for easy daily care

**StomoAct®**

Step 1-2 daily care

An enzyme toothpaste that can address bad breath and tartar with just 1-2 steps, even in the early stages of tooth decay, and low allergen dental gum with 500-dalton hydrolysis for allergy-free worry.

**Preventeeth Gum**, responsible for physical care & **Oramune powder**, responsible for oral immunity and bacteria care can be **combined One!**

Designed to prevent tooth damage during chewing, and to avoid leftover gum core after consumption

Central hole for preventing tooth damage

IgY-GP toxin-neutralizing antibody titer

## Gastrointestinal & Digestive system

- Chronic diarrhea and vomiting
- Sensitive stomachs
- Pancreatitis

## Gastrointestinal & Digestive system-1

Fasting **vomiting is routine.**

He is a sensitive stomach, so I make sure to give him probiotics.

**I go to the doctor, and everything is fine,**  
but he vomits yellow foam for no reason.

Often throw up because of hairballs  
also constipated.

Added "**cobalamin,**" **250ug/1g**  
which **animals that vomit and diarrhea a lot don't absorb well**  
and are prone to running low on

EPI(만성췌장부전)이 있는 개의 82%, 고양이 60%에서 혈중 코발라민 (Vit. B12) 농도가 낮게 나타났습니다. (Batchelor et al, 2007; Steiner and Williams, 2000)

## Gastrointestinal & Digestive system-2

He suffers from **chronic pancreatitis**.

The pain is so severe that I sometimes double over, and diarrhea and vomiting have **become a daily occurrence**.

He has been having frequent loose bowel movements for the past two weeks. It seems like he is having **trouble digesting food properly**.

Because of old age, he often experience diarrhea and feel **uncomfortable after eating**.

Mixing it before eating ensures that it's **pre-digested** and **won't leave residue in the intestines**

Please administer it like this

- Step 1 사료준비(건사료, 화식, 스틱, 캔 등)
- Step 2 사료에 급여량에 맞게 D/a 알파 뿌리기
- Step 3 잘 섞어준 뒤 30초 후 급여

※ 수분이 적게 함유된 건사료의 경우 약간의 물과 함께 섞어주시면 좋습니다.

### GI-calm

### Gastrointestinal total care nutrition with clinically proven gastric mucosal protective ingredients

#### Features and differentiators

1. Total care product with clinically proven gastrointestinal mucosal protective ingredients, 19 lactobacilli, 3 prebiotics, and cobalamin.
2. **Manage unexplained vomiting, irritable stomach, constipation, and hairballs at home.**
3. After 10 days of use, X-rays showed that the dog's swollen stomach returned to normal.
4. **Highly palatable** with chicken, plain yogurt, and goat milk.
5. There are two types of products : a **powder type** that can be fed with feed and a **drops type** that can be given as a snack

#### Specialized supplementary product Line

Vomiting / empty stomach vomiting

Frothy vomiting / food vomiting

Sensitive stomach

Hairball care

## DA-alpha

A new pancreatic supplement with a pre-digestion concept that can be given for a long period of time

### Features and differentiators

1. Chronic diarrhea and frequent vomiting indicate **digestion and absorption problems**.
2. When digestion and absorption are poor, food particles that are not well broken down become food for harmful bacteria and cause diarrhea and vomiting by multiplying harmful bacteria.
3. By sprinkling **DA alpha on the food beforehand** and delivering it 30 seconds later, it **pre-digests the food before ingestion**, making the stomach comfortable.
4. Double action of animal pancreatic enzymes and plant digestive enzymes.

**Specialized supplementary product Line**

## Supplement (Immunity, Antioxidants)

- Vegan Joint Supplements
- Helping liver cells regenerate (SAMe)
- Probiotics / Omega-3

## Criteria for selecting Probiotics

As one of the most widely used probiotics, Lactobacillus acidophilus is **vulnerable to heat, stomach acid, and oxygen**, so the selection criteria has been colony count and viability.

Oxygen

Stomach acid bile

Taking antibiotics

- 고초균  
Bacillus subtilis  
4X10<sup>9</sup> CFU/g
- 효모균  
S. cerevisiae boulardii  
1X10<sup>9</sup> CFU/g
- 이눌린  
Chicory extract  
200mg

Regular Lactobacillus

VS

Extra Strength

Vulnerable to oxygen

Vulnerable to stomach Acid, Bile

Vulnerable to antibiotics

The count of viable bacteria is important

**Bacillus subtilis** forms spores on its own and is **resistant to heat, stomach acid, and bile.**

**S. Cerevisiae boulardii** is **not affected by antibiotics.**

No need for encapsulation

## Criteria for selecting Omega-3

Reduced risk of heavy metals and animal allergies

microalgae

Antioxidant systems individually packaged in aluminum and in easy-to-eat liquids

Capsules type is difficult to take for pets due to they **can't take water together**

VS.

## Extra Strength Probiotics

### Probiotics that survive stomach acid and antibiotics

#### Features and differentiators

- We feed probiotics for constipation, diarrhea, gut health, and skin health.  
Lactobacillus, one of the most commonly used probiotics, is weak against heat, stomach acid, and oxygen, so the **selection criteria has been colony count and viability.**
- Signatureby focuses on **S. cerevisiae and Bacillus subtilis probiotics that are resistant to stomach acid, antibiotics, and heat.**
- Bacillus subtilis** is impervious to stomach acid and bile and reduces fecal shedding of diarrhea-causing bacteria.
- S. cerevisiae** are EFSA-approved for efficacy and safety and are resistant to antibiotics and stomach acid.
- It can be taken together with antibiotics and is also helpful for aftercare.

✓  
고초균  
Bacillus subtilis  
4X10<sup>7</sup> CFU/g

✓  
효모균

✓  
이눌린  
Chicory extract  
200mg

## Algal Omega-3

Sufficient contents of EPA and DHA, great ingredients, and feeding uniquely

### Features and differentiators

1. Active ingredient content of EPA+DHA: **690mg**
2. Raw material is a **vegan** product extracted at low temperature using **microalgae** (made in the U.S.A.)
3. **Sufficient clinical data** is available for dogs and cats (including pregnancy and lactation).
4. Contains vitamin C from sunflower oil
5. Most of Omega-3 are capsule type (40% gelatin), but it is difficult to feed pet because they do not drink with water, but this is **liquid, sealed individually**, so it does not need refrigeration, and of course, the **palatability is good**.
6. It may be effective for anti-cancer, heart, and kidney improvement.

## BiotaC AR-78 : Pet joint supplement that penetrates the joints where it's needed in just 4 hours

### Features and differentiators

1. Made with joint polymer hyaluronic acid, a **raw material with 7 U.S. patents** and clinical data for oral administration in dogs, which is also used in **racehorses**.
2. Vegan, free of sweeteners and animal ingredients.
3. It is a liquid type that **quickly penetrates into the joints in 4 hours** to control inflammation and pain, and can be properly fed according to body weight using an medicine dropper.

## BiotaC AR-78 Feline : Tasteless and odorless for cat joint and urinary tract care in one step

### Features and differentiators

1. Made from hyaluronic acid, a joint polymer with 7 U.S. patents and feline oral clinical data.
2. Vegan, free of sweeteners and animal ingredients.
3. Contains **MHB3**, an ingredient proven to **relieve joint pain and inflammation**, as well as **protect the urinary tract epithelium and strengthen the urinary tract barrier** in cats.
4. The liquid formula quickly **penetrates the joints to control inflammation and pain in as little as 4 hours**, and the dropper allows for weight-appropriate feeding.
